# **Product Description**

### BASIC USE

The S-TRX-HH Transceiver is a part of the ClearPath Spectrum Wireless System. When used in conjunction with the S-COR Coordinator. the S-TRX-HH functions in a similar role as traditional wireless transmitters. but this is where the similarities end. The Spectrum Wireless System provides several industry firsts:

- Digital two-way communication allows for greater security and ensures successful signal transmission between devices.
- LCD screen (S-COR) for quick and easy programming.

- Upon switch activation, the Transceivers communicate valuable information that is displayed on the LCD screen including: device ID, signal strength and battery monitoring.
- Pairing of multiple Transceivers with Coordinators.
- Two built-in outputs (S-COR).
- 3 year battery life (S-TRX-HH).

ClearPath Spectrum products operate at 2.4 GHz, making the wave length more than 5 times shorter than commonly-used frequencies. Shorter waves pass through cracks and barriers easier. and transceivers will continue to attempt to contact the Coordinator receives until it an acknowledgement.
